DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed on December 29, 2005 has been entered. No claim has been amended, added or cancelled. Claims 1-20 are still pending in this application, with claims 1 and 11 being independent.

Allowable Subject Matter

2. Claims 1-20 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Applicant teaches flat panel illumination devices having a light source couple to one side of a light pipe, and at least one light-emitting panel including a tapered light-injection area, such panel being coupled to the other side of the light guide by the narrow end of the tapered area. The panel also includes a light-emitting zone joined to the wide end of the tapered area. At least one irregular tetrahedrally-shaped light guide is embedded in the light emitting zone of the panel, such tetrahedrally-shaped light guide forming a groove and continuously increasing in surface area as the distance from the wide area increases.

No prior art was found teaching individually, or suggesting in combination, all of the features of the applicants' invention, specifically the tetrahedrally shaped light guide structure in combination with the claimed flat panel illumination device.

Pristash et al. (U.S. Pat. 5,136,480) and **Tail et al.** (U.S. Pat. 5,671,994)

disclose flat panel illuminator having a tapered light injection area, such area being coupled to light pipe illumination means at a narrow side, and an illuminated panel at the wide side. The panel includes grooves formed on a surface of the panel, however, such grooves are formed transverse to the direction of the injected light and do not increasing continuously in surface area as the distance from the wide area increases.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
